Uninstall Zend Server 5 for IBM i

Issue

This article tells how to uninstall Zend Server for IBM i version 5. For later versions, please go here: Uninstall Zend Server for IBM i - Zend Server 6 - 8.5. x, Zend Server 9.1.x, Zend Server 2018.x and Zend Server 2019.x

Environment

Zend Server for IBM i version 5.x, running on any supported version of IBM i.

Resolution

These are the steps to uninstall Zend Server 5 for IBM i:

From the 5250 command line, signed on as QSECOFR or with a *SECOFR class profile:

```
WRKOBJLCK OBJ(ZENDSVR) OBJTYPE(*LIB)
```

End any jobs displayed. Then:

```
GO LICPGM
```

Use option "12. Delete licensed programs"

Find product 2ZSVRPI, Zend Server for IBM i, on the list. Use option 4 to Delete it.

The delete process will back up certain files to preserve configuration and application files. The backup directory names will be in the format ZendSvrTIMESTAMP, where TIMESTAMP is a numeric timestamp representing the time the backup was made. The backup directories will be /usr/local /ZendSvrTIMESTAMP and /www/zendsvrTIMESTAMP. These directories can be deleted manually once the backup is no longer needed.
