# How do I reset my Zend Server admin password?

## Issue

I have forgotten my admin password and cannot long into Zend Server.  How do I reset my admin password?

## Environment

Zend Server 6, 7, 8

Linux

OS X

Windows

IBM i

## Resolution

### Linux and Mac OS X

On Linux and Mac OS X systems, run the following command as root.  This may require the use of `sudo` depending on your operating system. The parameter "Z3ndServerPassw0rd" should be replaced with your desired password.

```
# /usr/local/zend/bin/php /usr/local/zend/bin/gui_passwd.php Z3ndServerPassw0rd
```

### Windows

In Windows, navigate to the **Start Menu > Programs > Zend Server > Change Password**.  In Windows 7 and later, it is necessary to right-click on Change Password and run as Administrator.

### IBM i

For IBM i, from the 5250 command line:

```
go zendsvr6/zsconfig
```

Use option "1. Change password for Web Administration Console".  Enter the new password, then press enter to save it.
